

חברים-Meet

*Jewish Teachers from
around the world*

*LEARN, SHARE AND EXPERIENCE
TOGETHER IN A LONG-TERM
ONLINE PROGRAM*

Melitz
2019

חברים-Meet is a project that brings teachers from across the Jewish world with an emphasis on empowering the shared educational experience, strengthening the sense of belonging, and a way of inclining and emphasizing peoplehood, continuity and creative Jewishness.

The Program will run as a year program and the meetings will take place via an online platform, The Participants of **חברים-Meet** will get to know, learn and share experiences both on the personal and professional levels. Together, as a group, they will work to transform these experiences, to educational possibilities for their students, and to facilitate connections and acquaintance between students and classes.

The sessions will be held in language groups that are convenient for teachers (English, Hebrew, Spanish and more).

*What so special about **Meet-חברים**?*

***Meet-חברים** is a process project that begins at the first meeting and lasts as long as the teachers feel they got the best out of this process.*

The teachers are not alone. Melitz accompanies the teachers all along the way, in training, learning, directing all in order for the connection proses to be both significant and influential.

*As the basis for the success of the project, **Meet-חברים** offers its participants a deep acquaintance at the personal and group level, to be part of a joint educational framework were their professionalism as educators are at its core.*

*We see teachers as those who know best their students, and our role at **Meet-חברים** is to enable a deep and meaningful process and discourse that will ultimately be translated into educational moments that will be transmitted back to students and classrooms.*

***Meet-חברים** does not end here. **Meet-חברים** is all about enabling more and more connections to be created, it is a way to bring the discourse on Jewish Peoplehood to wider circles in the Jewish world.*

***Meet-חברים** will also form connections to other **Meet-חברים** Groups, whether on a personal or professional level so that the "Peoplehood Revolution" will ultimately be significant and will influence a growing public of educators in the wider Jewish world.*

So, how does it work?

*A group of **Meet-חברים** will include up to 12 participants.*

The groups will then meet once every three weeks, each of which will address issues related to Jewish Peoplehood, the five-legged table model, various educational issues, issues related to Jewish and world trends and so on.

Between the meetings, the group will continue to be in contact on social media (such as WhatsApp), in order to further deepen the connections between the participants.

In addition to the group's meetings, at an advanced stage of the year, the group will be divided into work teams. The work teams will begin a process at the goal of eventually creating new educational solutions at the classroom level.
